

RUPA P

MSc. Cloud Computing, UoI | 2+ YoE | Microsoft Excel | SQL | Business Analyst |
| United Kingdom | +44 7442287402 | [Gmail](#) | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Level 7 certified Process & Business Analyst with experience analysing operational processes, identifying inefficiencies and translating findings into change-ready improvements. Investigated 500+ business/system issues and managed 300+ scenarios per release, achieving 95% critical-workflow coverage and improving UAT efficiency by 25%. Recognised for data-driven problem solving, stakeholder collaboration and delivering measurable process and operational improvements.

RELEVANT SKILLS

- **Functional Competencies:** Business Analysis | Requirements Gathering & Analysis | Stakeholder Management | Business Process Analysis | AS-IS/TO-BE Process Mapping | Process Improvement | User Stories & Acceptance Criteria | UAT | Data Analysis | KPI Analysis & Reporting | Root Cause Analysis | Agile/Scrum | Process Documentation | Issue & Risk Analysis | Continuous Improvement
- **Technical Tools:** Microsoft Excel | SQL/MySQL | Power BI | Jira | Lucidchart | Figma | Postman | REST APIs | JSON | Selenium WebDriver | JMeter | Grafana | Git | Python | Java

WORK EXPERIENCE

Process Guide, Amazon Fulfillment Centre

Sep 2025 – Present

- Coordinated daily process activities for **8+ associates**, using Excel and staffing boards to allocate resources and maintain efficient operational workflows.
- Tracked and prioritised **20+ shipments per shift**, analysing workflow status and operational dependencies to identify bottlenecks and maintain process continuity.
- Investigated shipment, product and pallet exceptions using internal systems, identifying process pain points and coordinating corrective actions to minimise delays.
- Maintained accurate process documentation, exception logs and priority actions, enabling effective governance and handovers across **2 operational shifts**.
- Communicated process issues, priorities and escalations across operational teams, supporting continuous improvement and consistent service delivery.

Business Analyst, Tata Consultancy Services (TCS)

May 2021 – August 2023

- Analysed business and operational requirements into **300+ structured scenarios per release**, supporting end-to-end process validation and achieving **95% critical-workflow coverage**.
- Investigated **500+ business/system issues** using root-cause and impact analysis, identifying process inefficiencies, risks and improvement opportunities across delivery.
- Coordinated requirements clarification, solution validation and UAT with business and technology stakeholders, improving **UAT efficiency by 25%** and supporting implementation.
- Analysed **50+ API and integration scenarios** to identify process and system gaps, translating findings into actionable recommendations for technical teams.
- Improved delivery processes through automation and reusable workflows, increasing coverage by **40%** and reducing regression cycles from **8 to 3 hours (62%)**.

PROJECTS

- **Inbound Vendor Reconciliation & Exception Intelligence | SQL, Power BI, Excel** [Link](#)
Translated an inbound reconciliation problem into 8 prioritised requirements, AS-IS/TO-BE processes and 14 KPIs, identifying process improvement opportunities. Analysed 600 records using Excel and SQL, achieving a 98.83% data-quality pass rate and identifying 1,078 variance units, £57.2K illustrative exposure and 53

high-priority cases. Developed a 3-page Power BI dashboard to monitor performance, investigate exceptions and support data-driven continuous improvement.

- **Mental Wellbeing Mobile Application | Figma, User Research, Google Forms** [Link](#)
Analysed the needs and accessibility expectations of 3 personas and translated them into 10 medium-fidelity Figma screens covering wellbeing tracking, personalised activities and support discovery. Designed a 24-question survey and evaluated the prototype with 20 participants, analysing feedback on navigation, usability, personalisation and visual clarity. Converted user evidence into practical recommendations for improving accessibility, engagement and the overall digital experience.
- **Image Analysis Tool for Food Safety Inspection | Python, React, Flask, TensorFlow** [Link](#)
Designed and developed a full-stack application that translated food-safety objectives into an image-upload, analysis and results workflow. Integrated a TensorFlow CNN, colorimetric analysis, Flask REST API and React interface, achieving approximately 77% classification accuracy. Validated functional and technical requirements through 100+ functional, API, integration and system test scenarios, demonstrating end-to-end solution delivery, analytical problem-solving and quality assurance.

EDUCATION

MSc Cloud Computing, University of Leicester

Sep 2023 - Jan 2025

- **Highlight:** Applied requirements analysis, data analytics and user research across technical projects, including a 26,000+ image AI solution and a 20-participant UX evaluation study.

BSc Computer Science, University of Mumbai

Jun 2018 - May 2021

- **Highlight:** Elected Student Representative for 2 consecutive years, representing an entire class and communicating student requirements and concerns to faculty and university management.

COURSES AND CERTIFICATION

- Getting Started as a Business Analyst, LinkedIn Learning, 2026
- Get Data in Power BI, Microsoft Learn, 2026
- Get Started Building with Power BI, Microsoft Learn, 2026
- Microsoft Azure Fundamentals (AZ-900), Microsoft, 2023
