PROFESSIONAL SUMMARY

Level 7 certified Business Analyst with experience analysing business processes, operational data and stakeholder requirements to drive measurable improvements. Investigated 500+ business/system issues and managed 300+ scenarios per release, achieving 95% critical-workflow coverage and improving delivery efficiency by 62%. Recognised for data-driven problem solving, process optimisation and translating analytical findings into actionable business improvements.

RELEVANT SKILLS

- **Functional Competencies:** Business Process Analysis & Improvement | Requirements Gathering & Analysis | Operational & Business Data Analysis | KPI Monitoring & Performance Analysis | Stakeholder Management | Process Mapping & Workflow Documentation | Root Cause & Risk Analysis | Business Reporting & Recommendations | Change Management | Continuous Improvement | Business Case & Feasibility Support | Project Documentation | Strategic Analysis | Requirements Validation
- **Technical Tools:** Microsoft Excel | Power BI | SQL | Lucidchart | Jira

WORK EXPERIENCE

QA Engineer, Tata Consultancy Services (TCS)

May 2021 – August 2023

- Analysed business and operational requirements across client-facing technology services, translating stakeholder needs into 300+ structured scenarios per release and achieving 95% critical-workflow coverage.
- Investigated 500+ business and system issues using root-cause analysis and cross-functional collaboration, identifying operational gaps, risks and practical improvement opportunities.
- Coordinated requirements clarification, solution validation and UAT with business, client and technical stakeholders, improving UAT efficiency by 25% and strengthening implementation outcomes.
- Analysed system performance and integrations through 50+ API scenarios, identifying trends and issues to support data-driven recommendations and continuous improvement.
- Optimised delivery processes through automation and workflow improvements, increasing coverage by 40% and reducing regression cycles from 8 to 3 hours (62%).

PROJECTS

- **Inbound Vendor Reconciliation & Exception Intelligence | SQL, Power BI, Excel** [Link](#)
Translated an inbound reconciliation problem into 8 prioritised requirements, AS-IS/TO-BE processes and 14 KPIs, identifying process improvement opportunities. Analysed 600 records using Excel and SQL, achieving a 98.83% data-quality pass rate and identifying 1,078 variance units, £57.2K illustrative exposure and 53 high-priority cases. Developed a 3-page Power BI dashboard to monitor performance, investigate exceptions and support data-driven continuous improvement.
- **Mental Wellbeing Mobile Application | Figma, User Research, Google Forms** [Link](#)
Analysed the needs and accessibility expectations of 3 personas and translated them into 10 medium-fidelity Figma screens covering wellbeing tracking, personalised activities and support discovery. Designed a 24-question survey and evaluated the prototype with 20 participants, analysing feedback on navigation, usability, personalisation and visual clarity. Converted user evidence into practical recommendations for improving accessibility, engagement and the overall digital experience.
- **Image Analysis Tool for Food Safety Inspection | Python, React, Flask, TensorFlow** [Link](#)
Designed and developed a full-stack application that translated food-safety objectives into an image-upload, analysis and results workflow. Integrated a TensorFlow CNN, colorimetric analysis, Flask REST API and React interface, achieving approximately 77% classification accuracy. Validated functional and technical

requirements through 100+ functional, API, integration and system test scenarios, demonstrating end-to-end solution delivery, analytical problem-solving and quality assurance.

EDUCATION

MSc Cloud Computing, University of Leicester

Sep 2023 - Jan 2025

- **Highlight:** Applied requirements analysis, data analytics and user research across technical projects, including a 26,000+ image AI solution and a 20-participant UX evaluation study.

BSc Computer Science, University of Mumbai

Jun 2018 - May 2021

- **Highlight:** Elected Student Representative for 2 consecutive years, representing an entire class and communicating student requirements and concerns to faculty and university management.

COURSES AND CERTIFICATION

- Getting Started as a Business Analyst, LinkedIn Learning, 2026
- Get Data in Power BI, Microsoft Learn, 2026
- Get Started Building with Power BI, Microsoft Learn, 2026
- Microsoft Azure Fundamentals (AZ-900), Microsoft, 2023
